About

If each blood donation saves up to three lives, imagine how many you can save at your own blood drive. Hosting a blood drive gives you the chance to get your whole community involved and make an even bigger impact on the lives of others.

**DONATE
BLOOD+**

Why should you give Blood?

1. It saves lives — what else do you need to know?
2. It is not more painful than losing a loved one that you may save by donating!
3. It is your civic duty.
4. Because I know too many people who can't give blood.
5. Because some day, I may need someone to do the same for me.
6. Do unto others, as you would have them do unto you!
7. Because if you need blood one day, you would not hesitate to take it, so why would you hesitate to give it?
8. Blood donation is important because maintaining an adequate blood supply in our community secures blood transfusions for patients.
9. Because I can.
10. Nutter Butters.
11. The question is, why not give blood?
12. It gives donors a medical check at no cost.
13. Free cookies, juice and the satisfaction of helping others.
14. I can't discover a cure for cancer, but I can help keep someone alive while they are waiting for a cure.

Why should we donate Blood?

It is also needed for regular transfusions for people with conditions such as thalassaemia and sickle cell disease and is used to make products such as clotting factors for people with haemophilia. There is a constant need for regular blood supply because blood can be stored for only a limited time before use. Regular blood donations by a sufficient number of healthy people are needed to ensure that safe blood will be available whenever and wherever it is needed. Blood is the most precious gift that anyone can give to another person — the gift of life. A decision to donate your blood can save a life, or even several if your blood is separated into its components — red cells, platelets and plasma — which can be used individually for patients with specific conditions
